Dakshinkhan, Dhaka 1230, Bangladesh

Professional Summary

AI Developer with hands-on experience building and deploying intelligent systems across mobile and web platforms. Proficient in LLMs, RAG and Agentic RAG pipelines, computer vision, and NLP. Led AI development on 15+ live and production-ready applications spanning healthcare, education, wellness, and consumer tech. Published researcher (Springer, IEEE) in AI-based medical diagnostics, brain-computer interfaces, and source code summarization. Recognized as Spark of the Quarter for outstanding contributions as an AI Developer.

Technical Skills

Languages: Python, C, C++, SQL, HTML, CSS, MATLAB
AI/ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, NumPy, Pandas, Matplotlib, NLTK, OpenCV, Hugging Face Transformers
LLM & Generative AI: OpenAI GPT (API), Anthropic Claude (API), LangChain, RAG & Agentic RAG Pipelines, Prompt Engineering, Agentic Workflows, GitHub Copilot
Voice & Speech AI: ElevenLabs (Voice Cloning, TTS), OpenAI Whisper (STT), Real-Time Translation
Computer Vision & NLP: CNNs, Image Classification, Object Detection, Image Processing, Semantic Search, NER, Sentiment Analysis, CUDA (Beginner)
Deep Learning: CNNs, RNNs, LSTMs, Transformers, Autoencoders, GANs
Databases & Tools: MySQL, PostgreSQL, Vector Databases (FAISS, Pinecone), Git, GitHub, MS Office, Google Workspace
Soft Skills: Leadership, Project Management, Analytical Thinking, Research, Team Collaboration, Technical Communication

Work Experience

AI Developer Jul 2026 – Present
Sparktech Agency *Dhaka, Bangladesh*

- Promoted to AI Developer after progressing through Trainee and Junior AI Developer roles within 9 months; awarded **Spark of the Quarter** for exceptional contributions.
- Own the design and delivery of production Retrieval-Augmented Generation (RAG) and Agentic RAG pipelines for client-facing conversational AI, combining LLM reasoning with grounded retrieval to reduce hallucinations and improve accuracy.
- Ship AI-powered chat assistants and NLP components into live client applications, integrating APIs including ElevenLabs, OpenAI, Anthropic Claude, and SerpAPI.

Junior AI Developer Jan 2026 – Jun 2026
Sparktech Agency *Dhaka, Bangladesh*

- Contributed to the design and testing of RAG-based retrieval systems and LLM integration workflows under senior engineer guidance.
- Built and refined NLP preprocessing pipelines to improve input quality for downstream language models.
- Took ownership of specific features within larger AI systems, transitioning from supervised tasks to independent delivery — a key factor in promotion to AI Developer.

Trainee AI Developer Oct 2025 – Dec 2025
Sparktech Agency *Dhaka, Bangladesh*

- Onboarded into applied AI development, learning production RAG architecture, LLM prompt design, and NLP fundamentals in a live commercial environment.
- Assisted senior developers with model testing, data preparation, and evaluation of AI-generated outputs; promoted to Junior AI Developer within three months.

Associate (Full-time) Jan 2025 – May 2025
Acote Group *Dhaka, Bangladesh*

- Delivered high-quality data annotation, cleaning, and preprocessing across large-scale ML training datasets, improving the consistency and reliability of model inputs.
- Fine-tuned and benchmarked machine learning models against baseline metrics, identifying performance gaps and driving measurable improvements.
- Owned components of the end-to-end ML workflow, from raw data preparation through model evaluation.

Associate (Contract) Nov 2024 – Dec 2024
Acote Group *Dhaka, Bangladesh*

- Prepared and curated training data through structured annotation, cleaning, and preprocessing to support early-stage ML model development.
- Assisted in fine-tuning ML models and evaluating results against baseline metrics to inform iteration and improve outcomes.

Projects

Quranity | *Lead AI Developer & PM* 2026
- Quran-related AI app (live on Google Play) using NLP, semantic search, and RAG for accurate contextual Islamic knowledge retrieval; led project from concept to launch. Stack: Python, Flutter, RAG, LLM.

Hairlync | *Lead AI Developer & PM* 2026
- Hair diagnostics platform for barbers and specialists that analyzes hair and scalp condition via computer vision and predictive analytics, recommending tailored treatments, cuts, and colors. Publication in progress. Stack: Computer vision, CNNs, image classification.

JobAssist AI | *AI Developer* 2026
- AI career assistant that analyzes CVs, suggests improvements, generates tailored cover letters and application emails, and matches candidates to companies. Stack: LLM, RAG, OpenAI API, CV parsing, semantic matching.

Wondertales | *AI Developer* 2026
- AI story-generation app with voice cloning and a pre-built voice library that narrates personalized children's stories dynamically. Stack: ElevenLabs, LLM.

Finance AI | *AI Developer* 2026
- AI-powered personal finance assistant integrated with a client's live financial database, using intent detection and deterministic financial calculations to answer spending, budgeting, and cash-flow questions through a secure, OpenAI-based conversational layer. Stack: FastAPI, OpenAI API, MySQL/MariaDB, RAG.

Medical Imaging Diagnostics (Early Research) | *ML Researcher* 2023–2024
- Breast cancer detection and retinal key-sign identification using deep learning on medical images; built and evaluated CNN-based classification pipelines. Stack: Python, TensorFlow, Keras, CNNs, image processing.

Additional Projects | *AI Developer* 2025–2026
- **Frazzl Kid**, **Aura**, **Everidog**, **BYOJ**, **EQI30**, **Rise**, and **Alfred: AI Dating Concierge** — AI-driven apps spanning children's education, mental wellness, pet nutrition, generative design, and habit-formation.

Education

East West University Oct 2021 – Sep 2025
Bachelor of Science in Computer Science and Engineering (BSc in CSE) *Dhaka, Bangladesh*
- CGPA: 3.56/4.00 | EQF Level 6
- Core Areas: Algorithms, Data Structures, Software Engineering, DBMS, AI & ML, Statistical Modeling, Data Visualization.

Uttara Government College 2017 – 2019
Higher Secondary Certificate (HSC), Science | GPA: 4.75/5.00 *Dhaka, Bangladesh*

Civil Aviation High School 2015 – 2017
Secondary School Certificate (SSC), Science | GPA: 5.00/5.00 *Kurmitola, Dhaka 1229*

Publications

Assessing Generalization Capabilities of AI Models for Malaria Diagnosis 2025
- Md. Sakibur Rahman (2025). *Assessing Generalization Capabilities of AI Models for Malaria Diagnosis Using Blood Smear Images.* 2nd International Conference on Data Mining and Information Security (ICDMIS 2025), Springer.

Bridging Code and Comprehension: Transformer Models for Source Code Summarization 2025
- Co-author. *A Comparative Analysis of Transformer Models for Java Source Code Summarization.* 4th IEEE SPICSCON 2025, University of Rajshahi, Bangladesh.

Neural Command: Real-Time EEG-Based Brain-Computer Interface 2024
- Md. Sakibur Rahman (2024). *Neural Command: Real-Time EEG-Based Brain-Computer Interface for Assistive Robotic Control.* 3rd IEEE Robotics, Automation, and AI Conference (RAAICON 2024), IEEE.

Certifications & Languages

Certificate of Presentation – ICDMIS 2025 Apr 2025
- Eminent College of Management & Technology (India), University of Puthisastra, and Springer. Presented research on AI-based malaria diagnosis.

Certificate of Appreciation – IEEE SPICSCON 2025 2025
- Recognized as co-author for research on transformer models for source code summarization.
- **Languages:** Bengali (Native); English (Professional Proficiency – C1 Listening, C1 Spoken Interaction, B2 Reading/Writing/Production).
